1 Week 1: October 14-21, 2025

What I learned today:

- TLS(Transport Layer Security)

Notes: TLS is a cryptographic tools designed to provide security over computer networks such as Internet. It primarily provides Privacy through use of cryptography such as certificates. It runs in presentation layer and it is composed of TLS record and TLS Handshake Protocol.

Questions/To Review:

- Question 1
 - Question 2
-
